

Unit 1: Hair Restraints Assessment Answer Key
Online Food Safety Training for New Mexico Food Manufacturing Employees
Good Manufacturing Practices: Personnel

1. Label the two types of hair restraints in the pictures shown below.

Answer: Hairnets and beard nets are the easiest and safest types of hair restraints for food manufacturing employees to use. Hairnets and beard nets protect food from human hair as a physical contaminant.

2. Below are four pictures. Draw a circle around the pictures of food workers who are wearing hair restraints correctly.

1.

2.

3.
